

INTERNAL MEDICINE

Internal medicine encompasses a wide range of adult healthcare services, including the administration of immunizations, diagnostic bloodwork and lab services, chronic disease management (such as diabetes and hypertension), preventive care, smoking cessation counseling, and the comprehensive treatment of adults and elderly patients.

At Billed Right, we understand the complexities involved in managing a high-volume, broad-spectrum practice. Our revenue cycle solutions ensure greater than 99% accuracy on first-time claim submissions, enabling faster adjudication and improved reimbursement timelines.

We proactively manage denials and rejections to optimize your net collections—allowing you to dedicate more time to clinical care, not administrative burdens.

Billed **200+** MILLION in 2024

18 Days in AR | 48 TAT Hours | 26 Days TAT for payment
